

WAVY WASHTUB

To replace an antique metal English dolly washtub that was disintegrating, Pennoyer Newman cast the original to preserve its beauty and design. Called the Vintage Washtub, this stately container sports a centuries-old design with elegant lines and chevron flare running across its midsection. Made from a mixture of crushed marble, rock, and resin, the planter will not rust and is impervious to water. Planted with a citrus tree or arrangement of seasonal grasses, this washtub would make a great focal point in the garden. Every Pennoyer Newman container is handcrafted one at a time in New York City. Colors include Lead Grey (shown), Matte Black, Limestone, Terra Cotta (also shown), and White. 20.5" H x 18.5" W; 18 lbs

SPINNING TERRA COTTA

Designed by renowned textile designer Jack Lenor Larsen, the JackPot is a smoothly finished container inspired by a Japanese lacquer bowl. Part of the Seibert & Rice American Collection, which features exclusive pots by some of America's top designers, the JackPot graces the grounds of LongHouse Reserve, Larsen's home and 16-acre public garden in East Hampton, New York. Made in Impruneta, Italy, from high-quality clay, these pots are freeze-thaw resistant and will last for many decades, developing a rich patina over time. 25" H x 25" W; 140 lbs

CLAD CUBE

Reminiscent of a chic Rubik's Cube, this 3D Cube container comes in 180 colors or two natural patinas, and three materials: aluminum, mild steel, and Cor-Ten steel. Colors can be mixed and matched in a checkerboard pattern; include all of one color on each side, or create your own unique color combination. Weighing up to 475 pounds, this hefty container is part of the Cladding series by Ore Designs Inc. Pictured here in aluminum with powder-coated panels. 42" H x 42" W
